Galicia/*Norte* PT

The **CBC Observatory** results from the **cooperation** between:

With the **collaboration** of:

INSTITUTO NACIONAL DE ESTATÍSTICA  
STATISTICS PORTUGAL

(With regard to the preparation of associated metadata)

Given the differences between the statistical systems of the respective countries, only the variables for which it is possible to ensure the necessary harmonization have been selected.

Only the comparability of information allows the joint reading of the two regions and the deepening study of cross-border relations.

## CROSS-BORDER COOPERATION – **OBSERVATORY**

### Working Community Galicia/*Norte* PT

#### CBC Observatory GOALS?

- **PICTURE OF THE EURO REGION** - privileged instrument for collection, systematization and analysis of pertinent information on the economic, social and territorial development of the Euro region;
- **VISIBILITY** - dissemination of information and knowledge of the economic, social and territorial characteristics of the Euro region, the institutional and business environment, promoting more effective and dynamic cooperation;
- **IDENTIFICATION OF TRENDS** - reducing the uncertainty associated with economic activity, enhancing in this way, the interregional flows of people, goods and services, capital and knowledge.

Without mutual knowledge, cooperation can't be sufficiently intense and fruitful.  
The challenge is to reduce information asymmetries on both sides of the border.
